***possible* SOLUTIONS releases School Automation Suite 2.0**

Reduces Paperwork and Increases Efficiencies in America's Schools

Monroe, NY – November 12, 2008, *possible* SOLUTIONS, Inc. announced today, a new version of its School Automation Suite, its on-line FileMaker® Pro solutions geared toward K-12 school districts. The software suite supports FileMaker® Pro 9, has enhanced programs such as field trip management, discipline report management and custom web publishing. The on-line DEMO and download are now available at <http://possiblesolutions.com/test.php>

“With more school districts looking to be more efficient in its daily management functions, our School Automation Suite, streamlines required tasks on-line, saving time, energy and money,” says Aileen Silver, President of *possible* SOLUTIONS, Inc.

Educators are becoming increasingly more comfortable using technology. With these solutions, people can apply for jobs; teachers can apply for extra curricular positions and submit field trip requests on-line. “Great strides have been made to limit the mountains of paper forms, applications and requests,” adds Silver, *possible* SOLUTIONS’ cross platform database, is easily adaptable and are reasonably priced so that districts can see the benefits both financially and operationally.”

The School Automation Suite includes:

Job Application Management handles teacher, non-instructional and internal job postings and applications. It is easy to see how many applicants applied for a specific job, but also review and select the appropriate candidates(s).

Field Trip Management allows a teacher to submit field trip requests on-line. Principals and transportation approve or deny trips and the BOE approves all trips.

Course Application Management helps teachers and administrators figure out if a teacher’s continuing education course is reimbursable by the school district. Approved schools are listed, teachers and educators complete an on-line form and administrators approve.

Discipline Reporting Management saves a teacher’s time when reporting infractions. The principal determines what action should be taken and if necessary, whether the Board of Education should be involved.

Event Calendar lists all events taking place within the school district. Teachers, principals, and the Board of Education submit the event on-line. Principals approve all teacher submissions and administration approves all others. Events are classified so that the public does not see internal events such as staff meetings and district wide events are seen.
